Comparator manual de masa PS-3Y-KB

Comparator manual de masa PS-3Y-KB.

Descriere

The newest line of Radwag Mass Comparators enables adjusting mass standards and weights according to the OIML recommendations (R-111) from 500 g to 1 kg for F2 class and lower.

The comparators are used both for ensuring traceability of mass measurements, and verification of weights in accordance with the principles of legal metrology. RADWAG Mass Comparators have gained recognition among Accredited Calibration Laboratories, in many countries.

Mass comparator PS 3Y.KB series comprises two components. One of them holds the electronic module, and the other precise mechanical measuring system.

The comparator features an aesthetic, large weighing chamber and a glass draft shield in one with opened side and top door. All elements of the weighing chamber are manufactured from glass or metal to minimize the influence of electrostatic charges on weighing result. The PS 3Y.KB series features an intuitive menu supporting a user in instrument operation.
