Timbre si marci speciale.

Timbre si marci speciale. Producator: Zemic.

Descriere

BE Series Residual Stress Gages Gages for residual stress can measure the uneven plastic deformation, which are caused by the effect of external force or temperature.

TJ Series Waterproof Foil Strain Gages Adopting special adhesive with features of waterproof and mildew resistance, and the gages employ the fully encapsulated form. Waterproof gages are specially designed for stress measurement in the static pressure field under water within 5Mpa. They can successfully be used in the test of hermetic of the air plane cockpit, the stress analysis for internal wall of pressure container and the strength test and crustal stress test of dam and highway. TA Series High-elongation Strain Gages Adopting special grid and backing materials and are most commonly used for high-elongation or post- yield stress analysis of many materials and structures.

Note: 1.※※% is variable of 10%,15% ,20% respectivity. You can fill a specific variable into it according to your requirement. 2. TA Series strain gages are terminal DCA series tabs matched for high elongation strain gages. 3.The length of the lead wire of TJ series waterproofed foil strain gages is generally 1m, and also can be changed according to customer's requirements.
